- ☒ ~~Add Pagination Project~~
- ☒ ~~Create a group composition module that allows students to accept or reject group applications from other students.~~
- ☒ ~~Change the CMS Abbreviation. Capstone Management System implies only Capstone Projects.~~

Solution: **SP**

- ☒ ~~Label the designation of the current logged-in user.~~
- ☒ ~~Separate the eligibility pages for students and faculty.~~
- ☒ ~~The coordinator should be the one to provide the verdict for each defense.~~
 - i. **Solution:** From ADVISER TO COORDINATOR
- ☒ ~~AUTO POPULATE DEFENSE RECORD BASED ON PROJECT PHASES~~

☒ ~~FIX FINAL DEFENSE PROJECT PHASE~~

- ☐ Cater to changes in the number of defenses.
- ☒ ~~Separate the role of the coordinator from that of the faculty who is the current coordinator in your application.~~

Solution: STUDENT, FACULTY, COORDINATOR

- ☐ Provide a more effective and convenient way to represent the faculty schedule matching.
- ☐ Make your system scalable and flexible.
- ☐ Follow conventional UI/UX principles in designing your system. UI needs more improvement
- ☒ ~~Only allow for registrations using GBox accounts.~~

MANUSCRIPT

- ☐ Revise the following sections in your manuscript:
 - ☐ Revise the Activity diagrams
 - i. the labels or captions for your activity diagrams. It's recommended to label them using appropriate activity or process names to enhance clarity and accuracy.
 - ☐ Revise the Use Case diagram
 - i. Be able to represent the multiple roles (coordinator, panel, adviser) of the actor FACULTY in your use case diagram this is to provide clarity that some use cases only apply to a given role (although you added a use case "can serve as a panelist and adviser) still not all faculty do the use case identified in the diagram.
 - ☐ Revise the ERD
 - i. The roles of PANEL, ADVISER, and COORDINATOR all represent the FACULTY entity. Why is it necessary to create separate entities for these roles? Instead of treating them as distinct entities, consider creating a ROLE entity type representing the roles of panel, adviser, and coordinator.
 - ii. Revisit the PROJECT_PHASE entity
 - iii. Do not add the attributes that will serve as foreign keys in your logical schema to the diagram. Represent it in your data dictionary. Unless the notation that you use is Microsoft Visio notation.
 - ☐ Include a Data Dictionary reflecting your ERD.

-
- ☒ Show Proposals submitted by the Project Group only
 - ☒ Put on the forms the adviser. If adviser has pending projects
